

Practitioner Level I Certification Course

Gary Kowaleski, Certified Instructor

Classes for certification as a Touching the Light Practitioner Level I will begin in June 2021 and will run through November 2021. This unique first year program is a prerequisite to the Practitioner Level II certification course (which will run annually beginning in early 2022). As a practitioner of Touching the Light, you will gain a command of knowledge and practice working both in third dimensional reality and beyond.

Students of Touching the Light will be taught every aspect of consciousness awareness and how consciousness works in conjunction with creation to create new and different realities.

Our students will learn how to use every sense including their 7th, or multi-dimensional senses in order to clearly experience all aspects and levels of both the energy system and the Etheric anatomy.

Students will learn how to access their higher levels of consciousness and how to use that access in order to bring in information, interpret it, and then apply it to the healing process. In addition to hands-on processes, students will also learn how to effectively perform long distance healing.

Our methodology maintains careful balance of our subjects in order to avoid what many call the after effect healing crisis. When a full system such as the physical, energy and subtle bodies are harmonized simultaneously, exacerbation of intensified systems can be alleviated and the system can be more focused on its healing.

When changes occur on subtle levels, life experience changes too. Every student will be given not just a series of movements or a predictable modality that is unwavering in its techniques, but instead will be taught how to find from within themselves by mergence with their clients what the true cause of issues is, how to change the reality of that cause and how to alleviate symptoms and where possible, alleviate pain as well.

Our students, in conjunction with learning how to Touch the Light, will be given a full set of self awareness and life skills tools so that they may become compassionate, sensitive and heart-centered human beings first and healers second.

The Practitioner I level is a one year program with full certification once the student has become proficient and competent to practice Touching the Light. There are never two alike, so the learning process expands over time as does the practitioner's awareness of the more subtle aspects that the entire system communicates.
